Operation of garage parking system for permit holders?
Drive up to the entry or exit kiosk, the LPR camera will scan your license plate and if you have a valid permit the gate will open to allow entry or exit.

Some permit holders have registered more than one vehicle to their garage permit and your monthly permit allows you to park only one vehicle at a time inside the garage. If you alternate between vehicles to park in the garage, the current vehicle parked in the garage must exit before you can enter and park a different vehicle.

How can I enter or exit the parking garage if the LPR camera fails to read my vehicle license plate?
If you are at the entry or exit kiosk and the gate does not open, you can use one of the backup access credentials mentioned below.

ParkWhiz App – Review the attached file "***FLASH PARCS Monthly - ParkWhiz App.pdf"*** to download and activate the app on your smartphone. To activate ParkWhiz your mobile number must be registered and linked to your permit. If you are not able to activate the ParkWhiz app please contact us at parking@easton-pa.gov and provide your name, mobile number, and your vehicle license plate number.

Mobile Number – Review the attached file "**FLASH PARCS Monthly - Mobile Number.pdf**" on how to use your mobile number to enter and exit the garage as a backup access.

HELP – If you cannot use any of the above access options you can utilize the HELP button on the kiosk screen to get assistance. Please note that as a permit holder you have limited use of the HELP button, if you encounter issue with using ParkWhiz or Mobile Number access options you will need to contact us at parking@easton-pa.gov for assistance.
